

Justrite **QuietSite™ Noise Barriers** **Applications at a Glance**

Justrite QuietSite™ Noise Barriers provide flexible noise control for a wide range of industries and worksites. They reduce disruptive sound, protect workers and nearby communities, and help operations stay compliant with regulations. QuietSite™ Noise Barriers are the smart solution for keeping projects safer, quieter, and more productive.

Construction Sites

Reduce job site noise and protect nearby communities

Industrial Equipment & Machinery

Contain sound from generators, compressors, and pumps

Manufacturing Facilities

Lower noise around production lines and machinery

Infrastructure & Roadwork Projects

Reduce noise from roadwork and public works projects to meet local regulations

Energy Production & Extraction Sites

Helps drilling and refining operations meet noise compliance standards

Mining & Quarry Operations

Limit sound from blasting, excavation, and material handling equipment

Utility Maintenance & Field Work

Control noise during temporary repair and maintenance projects

Outdoor Events

Minimize sound impact at concerts, festivals, and staging areas
