

Make-A-Berm™ Spill Barrier System

A Smart Approach to Spill Containment

Make-A-Berm™ gives you the flexibility to build custom containment exactly where you need it. Adaptable and versatile, it's ideal for use around stationary equipment, in irregular layouts, or in tight spaces. It adjusts to your environment so you can stay compliant and protected without disruption.

Why Choose Make-A-Berm™?

Versatile and Customizable

Create containment in any shape or size. Straight sections, corners, and accessories connect easily for a custom fit. Available in multiple heights including 1.5", 2", 4", and 6" to meet your requirements.

Ideal for Stationary and Hard to Move Equipment

Install directly around equipment, machinery, or spill-prone areas without disruption.

Durable, Long-Lasting Protection

Crush-resistant foam walls rebound after foot traffic and hand trucks. Heavy duty versions withstand forklifts and utility vehicles.

Chemical and Weather Resistant

PVC coated fabric stands up to oils, fuels, acids, and other industrial liquids indoors or outdoors.

Assembled in the USA

Built with American quality and reliability you can count on.

Supports Compliance

Helps meet EPA SPCC requirements for spill prevention and containment.
