

Make-A-Berm™

Applications at a Glance

Justrite's Make-A-Berm™ provides fast, flexible spill containment anywhere it's needed. It stops leaks before they spread, protecting assets, avoiding downtime, and keeping facilities compliant. With flexibility to fit a wide range of industries and layouts, Make-A-Berm™ is a smart solution wherever spills threaten operations.

Injection Molding Machines

Contain hydraulic fluid leaks around large, stationary equipment.

CNC Machines & Metalworking

Keep cutting fluids and oils from spreading across shop floors.

Stationary Tanks & Pumps

Provide reliable containment for fixed tanks, pumps, and solvent storage.

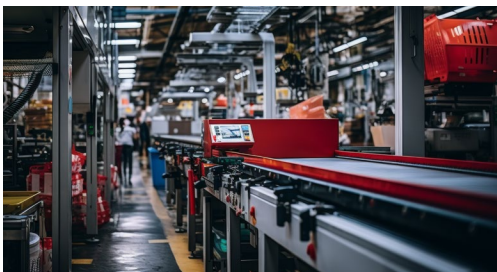

Compressors & Hydraulic Power Units

Capture leaks from lubricants and hydraulic oils at the source.

Forklift & Vehicle Charging/Refueling Stations

Prevent drips of fuel, oil, or battery electrolyte in high-traffic areas.

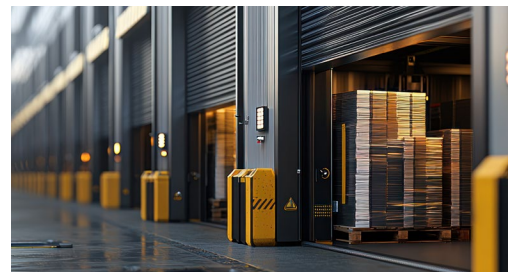

Manufacturing & Assembly Lines

Surround long or irregular machinery layouts to contain oils and coolants.

Data Center Cooling Systems

Protect critical cooling infrastructure from leaks and downtime.

Driveways & Garage Doors

Block liquids from escaping doors or entering work areas with a low-profile barrier.
